

# AKHIL-R

Mern Stack Developer

## OBJECTIVE

Enthusiastic Frontend Developer with a robust proficiency in web technologies and a flair for innovative design, dedicated to creating captivating user interactions. Well-versed in crafting responsive, user-focused web applications and adept at harnessing cutting-edge frontend frameworks, libraries, and tools to create fluid and visually enticing interfaces. Excels in collaborative environments, working seamlessly with diverse teams to translate ideas into comprehensive, feature-rich digital solutions.

## EXPERIENCE

### Internship

Mern Stack Web Developer  
Intership|Softtroniics|Palakkad,Kerala|  
2023-Present

- Throughout the internship, my knowledge and skills expanded significantly. I deepened my understanding of front-end technologies, honed my back-end development capabilities, and gained proficiency in managing databases and APIs. I learned to troubleshoot issues, collaborate effectively with team members, and manage my time efficiently to meet project deadlines.

## PROJECTS

### 1-PARALLAX WEBSITE

crafted a captivating parallax website using HTML and CSS, seamlessly blending layers that move at different speeds as users scroll. Through this dynamic design, I showcased compelling visuals and engaging content, offering an immersive and interactive browsing experience. By creatively merging these technologies, I brought depth and elegance to my website, delivering an unforgettable journey for visitors.

### 2-RESTAURANT TEMPLATE

I meticulously designed a restaurant template using HTML and CSS, fashioning an enticing online presence for culinary delights. From elegant layouts to harmonious color palettes, I infused the template with a delectable visual identity. This creation not only showcases the restaurant's ambiance but also ensures seamless navigation, offering patrons a taste of the dining experience before they arrive.

### 3-NETFLIX CLONE

I skillfully crafted a Netflix clone website using HTML and CSS, mirroring the iconic streaming platform's look and feel. With a user-friendly interface and responsive design, I brought the binge-worthy experience to life, allowing users to explore content effortlessly. Through meticulous attention to detail, I captured the essence of Netflix while honing my web development prowess.
